MUCK TRAPPER SR

Self Recirculating Fountain Solution Filtration

Product Overview :

A self-contained filter system incorporating our unique **Allied *Mucktrapper**.

Drop into any fountain solution system tank and create a filtration recirculation system within your existing fountain solution recirculation tank. This will ensure cleaner, more consistent and active fount water for much longer periods of time. *Patent Pending Allied Muck Trapper technology

Product Benefits

- Allows fountain solution to perform at an optimum level for longer, helping to minimize print issues arising from contamination.
- Reduces or eliminates the need to dump and dispose of spent fountain solution as well as the associated costs and cradle to grave responsibility
- Eliminates the need to spend 10's of thousand of dollars on unnecessary stand alone filtration systems.
- Mucktrapper has a long working life and will keep your current fount filters cleaner.
- A recirculating fount filter system to add into your current system making it more effective
- Independent lab testing shows a 95% efficiency rating based on a single pass

Recommendations for Use

Upon initial use, place the pump and attached Mucktrapper into the bottom of your fountain solution recirculation tank, plug in and let run. When a change is needed, unplug the pump from power supply, replace the spent Mucktrapper with a new one, plug in and away you go!

HOW MUCKTRAPPER FILTERS WORK: Muck Trapper is a reverse dual graded filter with filter walls more than 2' 'thick. The inside walls are a larger micron that tapers down to a much smaller micron outer wall.. As fountain solution water enters into the inner wall, larger particles are allowed to pass into the filter wall instead of clogging up the inner wall entrance. As it continues through the tapered wall towards the outer wall, smaller contaminates are caught within the filter wall. The Muck Trapper material traps and holds paper coating, lint, emulsified inks, spray powder and other contaminates without clogging up quickly.
