

MUCKTRAPPER SR Self Recirculating Fountain Solution Filtration

Product Overview

A multi month long lasting self recirculating filter system.

Drop into any fountain solution system tank and create a filtration recirculation system with in your existing fountain solution recirculation tank to ensure cleaner, consistent and active fount water for much longer periods of time with out having to dump.

**Patent Pending Allied Muck Trapper technology*

Product Benefits

- Allows fountain solution to perform at an optimum level longer ,eliminating print issue's from contamination/weak fount
- A recirculating fount filter system to add into your current system.
- Reduces or eliminates the need to dump and dispose of spent fountain solution as well as the costs and cradle to grave responsibility
- Eliminates the need to spend thousand of dollars on unnecessary stand alone filtration systems.
- Muck Trapper lasts a long time and will help to keep your current fount filters cleaner.

HOW MUCK TRAPPER FILTERS WORK: Muck Trapper is a reverse dual graded filter with filter walls more than 2' 'thick. The inside walls are a larger micron that tapers down to a much smaller micron outer wall.. As fountain solution water enters into the inner wall, larger particles are allowed to pass into the filter wall instead of clogging up the inner wall entrance. As it continues through the tapered wall towards the outer wall, smaller contaminates are caught within the filter wall. The Muck Trapper material traps and holds paper coating, lint, emulsified inks, spray powder and other contaminates without clogging up quickly.

Recommendations for Use

Upon initial use, Place the pump and attached Muck Trapper into the bottom of your fountain solution recirculation tank, Plug in and let run. When a change is needed, unplug the pump from electric and replace the spent Muck Trapper with a fresh one.. **A by-pass kit specifically designed to react with the pressure (psi) from the Muck Trapper is available. When filter is full and pressure builds up, the fountain water will go through the By Pass letting you know it is time put on a fresh Muck Trapper**
