

## FOUNTAIN ADDITIVE METAL PLATE CLEANER

*Eliminates many major fount related problems*

### **Product Overview**

Add into any acid based fountain solution to eliminate plugging problems and open up tiny reserves. It helps run metallic inks with the ease of regular inks, reduces water settings, prints dense solids and helps to eliminate ghosting. Use of this product as a fountain additive can make the difference between dull looking and sharp, clean halftones. Use as a fountain additive to stop scratches, scum, and oxidation before they can occur and to remove once they occur.

### **Product Benefits**

- Cleans and desensitizes the plate on every revolution of the plate cylinder
- Runs metallic inks with the ease of regular inks.
- Eliminates scratches before they can print.
- Eliminates scumming and oxidation.
- Eliminates plugging problems.
- Keeps reverses razor sharp.
- Keeps fine line screens clean.
- Helps to eliminate ghosting.
- Prints dense solids.

### **Recommendations for Use**

**For use as a fountain additive: start** with 1/4 ounce per gallon of mixed fountain solution, if necessary increase to 1/2 ounce. Do not use over 1/2 ounce per gallon of mixed fountain solution.

**For permanent removal of deep scratches during the press run:** add 1/4 to 1/2 ounce per gallon of mixed fountain solution. Remove excess ink from scratch with an every-day plate cleaner. Pour Fountain Additive Metal Plate Cleaner onto a clean sponge or shop towel, wipe onto scratch. Using it directly on the plate will keep the deep scratch out until the additive takes over in the fountain solution. Remember, once this is added to the fountain solution it cleans and desensitizes the plate on every revolution of the plate cylinder.
