SA8-C

Produces and maintains the highest of quality printing

Product Overview

SA8-C is designed for critical sheet fed and web-offset applications. The high level of desensitizing salts and gums ensure clean, consistent printing at all times.

Based on one of our top selling performance fountain solutions we targeted the problem areas of modern print and plates. SA8-C addresses these problems, particularly plate sensitivity on long runs and maintaining the highest possible reproduction quality. SA8-C will perform at the highest level and help the pressman maintain production and quality targets fewer problems

Product Benefits

- Keeps dot gain to a minimum
- Better control of water / ink balance
- Extra desensitizers with high gum content
- Use with CTP or Conventional plates
- Use with conventional and Ultra Violet Inks
- Opens tiny reverses, screens and halftones
- Provides lubricity to the blanket for fast paper release
- Contains anti corrosion, anti-bacterial and mold inhibitors,
- Contains a blend of dryers to ensure proper drying on all surfaces, including plastics
- Has a stabilized (buffered) pH. To reduce pH drift
- No need to gum plates during brief stops
- For high speed presses sheet fed and web

Recommendations for Use

Dosage: is only 3-4 ounces per gallon of water

OUNCES	COND
3	1725
4	2325

Approximate conductivity over water per dose:-
