

Unifount

For use with Polyester (laser)/Polyester Silver imaged Plates

Product Overview

Unifount permits a stable ink/water balance to be achieved at lower ink and water settings. Cleaner, sharper and brighter colors result, with no tinting. Formulated to run with integrated dampening systems common on smaller presses. Capable of being used with metal and polyester plate systems.

Unifount contains a balanced pH buffering system which ensures little or no pH drift. Contains materials to guard against mold growth and chemical plate blinding.

Product Benefits

- Fast Start ups.
- Use with Polyester(laser & silver image)
- Use with Metal
- Controlled water pick-up in ink
- More salable sheets, faster start-up
- Eliminates tinting and ink build-up
- Prevents oxidation spots during stoppages
- Compatible with oil, and rubber based inks

Recommendations for Use

Dosage: - between 5 and 8 ounces per gallon of water. Recommended starting with 5 ounces per gallon of water.
