UNIVERSAL FOUNT #1

Digital Metal, Polyester and Conventional Plates

Product Overview

Universal Fount #1 permits a stable ink/water balance to be achieved using both polyester and metal plates. This means cleaner and faster start-up, less ink breakdown and less ink build-up on metering roller or blankets

Universal Fount #1 keeps a good film of water on the plate background while ensuring good plate desensitization. When changing from Polyester to metal plates or visa versa, no changes are necessary. Use the same dosage and start the press.

Product Benefits

- Inhibits excess water pick up in inks.
- More salable sheets, faster start-up
- Inks print and stay dense
- Eliminates tinting / build-up of ink on metering rollers and blankets

Recommendations for Use

Dosage – 4 to 5 ounces per gallon of water

We recommended starting with 4 to 5 ounces per gallon of water
