# AQUARIAN GUM

*Pure Micro-Filtered Gum*

## *Product Overview*

Aquarian Gum designed to perform the same function as Gum Arabic, has been used since the early 1990s as a fountain additive and a plate finishing gum. With today's plate technology Aquarian gum has become preferred. Very economical cost when compared to Gum Arabic

## *Product Benefits*

- **In plate processors:** assures plates are protected for short-term storage. When water hits the plate it reactivates the gum, assures quick, clean start-up.
- **On plate by hand:** use to store a plate or when the time comes save the plate for later use.
- **On metering roller:** to keep desensitized, water attractive and free of ink.
- **A fountain additive:** to eliminate scumming, open tiny reverses, eliminate slight scratching on plates caused by dirty paper stocks and help control water speeds.

## *Recommendations for Use*

**Plate processors:** use Aquarian Gum straight out of the container or reduce with water by ½.

**On plate by hand:** pour a liberal amount of Aquarian Gum onto a sponge or shop towel and wipe evenly over entire plate.

**On metering roller:** clean built-up ink off metering roller, pour Aquarian Gum onto a clean sponge or shop towel, wipe metering roller with a side-to-side motion until entire metering roller has been treated.

**A fountain additive:** Add to pre-mixed fountain solution in increments of one ounce per gallon to keep plate clean and reverses open during press run.
