HAND SCRUB

NOT JUST ANOTHER HAND CLEANER

Product Overview

Cleaning the hands no longer requires the use of harsh and potentially harmful chemical solvents. Hand Scrub uses a combination of small spherical scrubbing beads and detergents.

Why does Hand Scrub work so well and what makes it an environmentally friendly formula?

The washing action of your hands activates the spherical granules in Hand Scrub which work to lift ingrained soils from the skin, at the same time detergents suspend, ink, grease, dirt particles and condition the skin. A simple rinse with water removes all residues

Product Benefits

- Environmentally Friendly Formula
- Removes ingrained inks, grease and dirt from hands
- Works faster than most other hand cleaners
- Leaves hands feeling clean without greasy residues

Recommendations for Use

Apply a little Hand Scrub into palm of hands. Add a small amount of water and rub hands vigorously together for 5 to 10 seconds. Hold hands under water, maintaining the rubbing motion to wash off.
