DYNAKLEAN

Deep cleans, deglazes, and conditions conventional and UV ink rollers
No petroleum distillates. V.O.C. is less than 10%.

Product Overview

Contains a biodegradable non-petroleum solvent from renewable resources to promote a cleaner and safer environment. Removes inks and contaminants fast!

Ink rollers can become contaminated with ink pigment, friction glaze, paper dust, spray powder, gums, and surfactants. These contaminants can cause transfer issues, premature hardening of the rollers, and poor ink and water balance. This frequently results in inconsistent print quality and expensive waste.

When used correctly, **Dynaklean** will deep clean, deglaze, and condition ink rollers. **Dynaklean** removes ink fast, including the deeply ingrained ink pigment, and eliminates the need for harsh deglazers.

Product Benefits

- **Utilizes an environmentally safer, biodegradable, non-petroleum solvent.**
- Deep cleans ink rollers beyond just the surface.
- Removes conventional and UV inks.
- Allows for quick color changes.
- Conditions ink rollers.
- Low V.O.C.
- Pleasant citrus odor.

Recommendations for Use

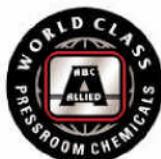

Wash up using your normal wash up procedure. Apply enough **Dynaklean** to the top roller to wet the entire roller train and allow it to run in for 5 to 10 minutes. Wash the rollers clean with your normal solvent and you're ready to go. **Dynaklean** can be used with any Allied Enviro friendly wash
