HYDRO WASH

Super Concentrated Water Miscible Blanket/Roller Wash

Product Overview

Designed to be mixed with 40% to 60% water.

The nature of the resulting emulsion is such that oil and water based contaminants are pulled from the rollers and blankets at a faster/deeper rate than with standard press wash.

Removes ink, paper coating, paper glaze, dried gum, friction glaze, oil and water based surfactants. Lowers V.O.Cs... Dries like a standard press wash.

Less solvent comes in contact with the roller and blanket compounds.

With 60% water added, each gallon of Hydro Wash produces 2.5gl of wash.

Product Benefits

- Easy to use – emulsion is stable and forms quickly.
- Addition of water enhances performance by removing both oil soluble and water-soluble material.
- Cost effective and a multi-purpose wash.
- Cleans deeply and removes both oil and water soluble materials.
- Evaporates as any standard blanket and roller wash.
- Low Odor

Recommendations for Use

As a roller wash: Squirt on the top roller of the ink train. Allow the wash to work in, adding more if necessary. When the ink appears to be emulsified engage clean-up blade or wash-up device. Finish wash-up by flushing with more cleaner until all the ink is removed. Follow with a water wash.

As a blanket wash: Start with 40% Hydro-Wash / 60% water mixture and experiment with the dosage. For instance at mixture of 75% Hydro-Wash / 25% water will have a thinner consistency and may be preferred. Pour a liberal amount onto a clean shop towel or rag. Wipe over the entire blanket until clean using a side-to-side motion.
