PULL IT OFF!

Roller Cleaner & Conditioner

Product Overview

Pull It Off! Is designed to remove ink and debris off the rollers in the ink train. While a liquid product may appear to coat the rollers faster and give the impression that it is dissolving the ink away more quickly, Pull It Off! Cleans more thoroughly. The paste nature of the product holds the detergents more closely onto the roller surface allowing a greater degree of emulsification of the ink to occur. It also has an increased ability to penetrate and lift out dried ink particles and pigments off the rollers

Product Benefits

- Easy to apply
- Thorough cleaning without harsh abrasives
- Deeper cleaning than that of a liquid product
- Complete color changes in a shorter time

Recommendations for Use

1. Apply sufficient Pull It Off! With an ink knife to the top ink roller.
2. Let press idle while Pull It Off removes ink and other debris.
3. If rollers appear to be coated properly, the emulsification process can be speed up by squirting a small amount of inexpensive press wash to wet out the rollers a little.
4. Wash out emulsified ink and Pull It Off with a thorough flushing using non-water miscible (surfactant free) wash.
