

UV-EP

UV wash; gentle on EPDM rollers

Product Overview

Allied spent a considerable amount of time researching the components of various UV washes on the market and found that in many cases, the formulations were identical or very similar. Through our testing, we discovered many products fell short in one of two ways:

1. They did a good job of removing some UV colors but not all, or
2. They removed all UV ink well but caused damage to rollers and blankets relatively quickly

With this knowledge, Allied developed **UV-EP**, a dedicated wash that cleans all UV inks well but is not as aggressive on the compounds used to manufacture EPDM rollers.

Product Benefits

- Removes all UV inks quickly.
- Deep cleans rollers and blankets.
- Low odor when compared to many other washes.
- Leaves no greasy residue.
- Gentle; not as detrimental to EPDM rollers and blankets as many washes.

Recommendations for Use

As a roller wash: pour a liberal amount of **UV-EP** over inking rollers, adding more if necessary. Engage washup attachment.

As a blanket wash: pour a liberal amount of **UV-EP** onto a clean shop towel. Wipe entire blanket with a side-to-side motion.
