X-TREME KLEEN

Blanket and roller wash up to 50% water miscible

Product Overview

X-Treme Kleen is a water miscible blanket and roller wash that can accommodate an equal volume of water without sacrificing performance. The resulting emulsion optimizes the performance of the solvent, dissolving ink quickly and removing dried gum and paper contaminants from blankets and rollers. The incorporation of water into **X-Treme Kleen** allows for a reduction in VOCs and cost to the printer.

Product Benefits

- Low odor.
- Medium/fast evaporation rate.
- Easy to use; emulsion forms quickly.
- Leaves no greasy residue.
- Less solvent coming in contact with roller and blanket compounds.
- Addition of water enhances performance by removing both oil and water.

Recommendations for Use

Use as is or add up to 50% water and shake well to blend the water and **X-Treme Kleen**.

As a roller wash: pour a small amount on the top roller of the ink train. Allow **X-Treme Kleen** to work in, adding more if necessary. When the ink appears to be emulsified, engage cleanup blade or washup device. Finish by flushing with more **X-Treme Kleen** until all the ink is removed. Follow with a generous water wash to remove all detergents. If water is added, the **X-Treme Kleen**/water emulsion will separate over time. A quick shake of the washup bottle will reform the emulsion.

As a blanket wash: pour a liberal amount onto a clean shop towel or rag. Wipe over the entire blanket until clean using a side-to-side motion.
